

Street Food Range

OUR SOLUTIONS
FOR ONSITE CONSUMPTION

Artigian Carta

Our solutions for safe consumption on site

The new range offers a wide choice of high quality disposable products in various shape and varieties, from the most classic pizza plate, triangular wrap holder and crepes holder to the innovative platters made from recycled kraft board, which represent a sustainable and recyclable choice, making your dishes even more special and genuine.

Today more than ever, for all the businesses offering food services it is of fundamental importance to have perfect packaging in order to guarantee the total safety, hygiene, functionality and appearance of the products for consumption on site. For this reason our items can be customised with high quality and standards both with printing on the production line or with the Easypack 72H service.

CERTIFICATION

Artigian carta’s commitment to improving its business management and creating its products has enabled it to obtain these important certifications in various fields. These rigid normative frameworks which involve its staff, its production system, quality control of its products and suppliers allow it to guarantee the reliability and safety its customers deserve.

BRCGS PACKAGING

ECO-SUSTAINABILITY

Artigian Carta’s commitment to an eco-sustainable future passes through the rethinking of its own packaging. So, on one hand it can demonstrate to its customers products marked “Recyclable with paper - Aticelca® 501” and on the other it has developed ACompost®, to identify all the compostable products it has.
